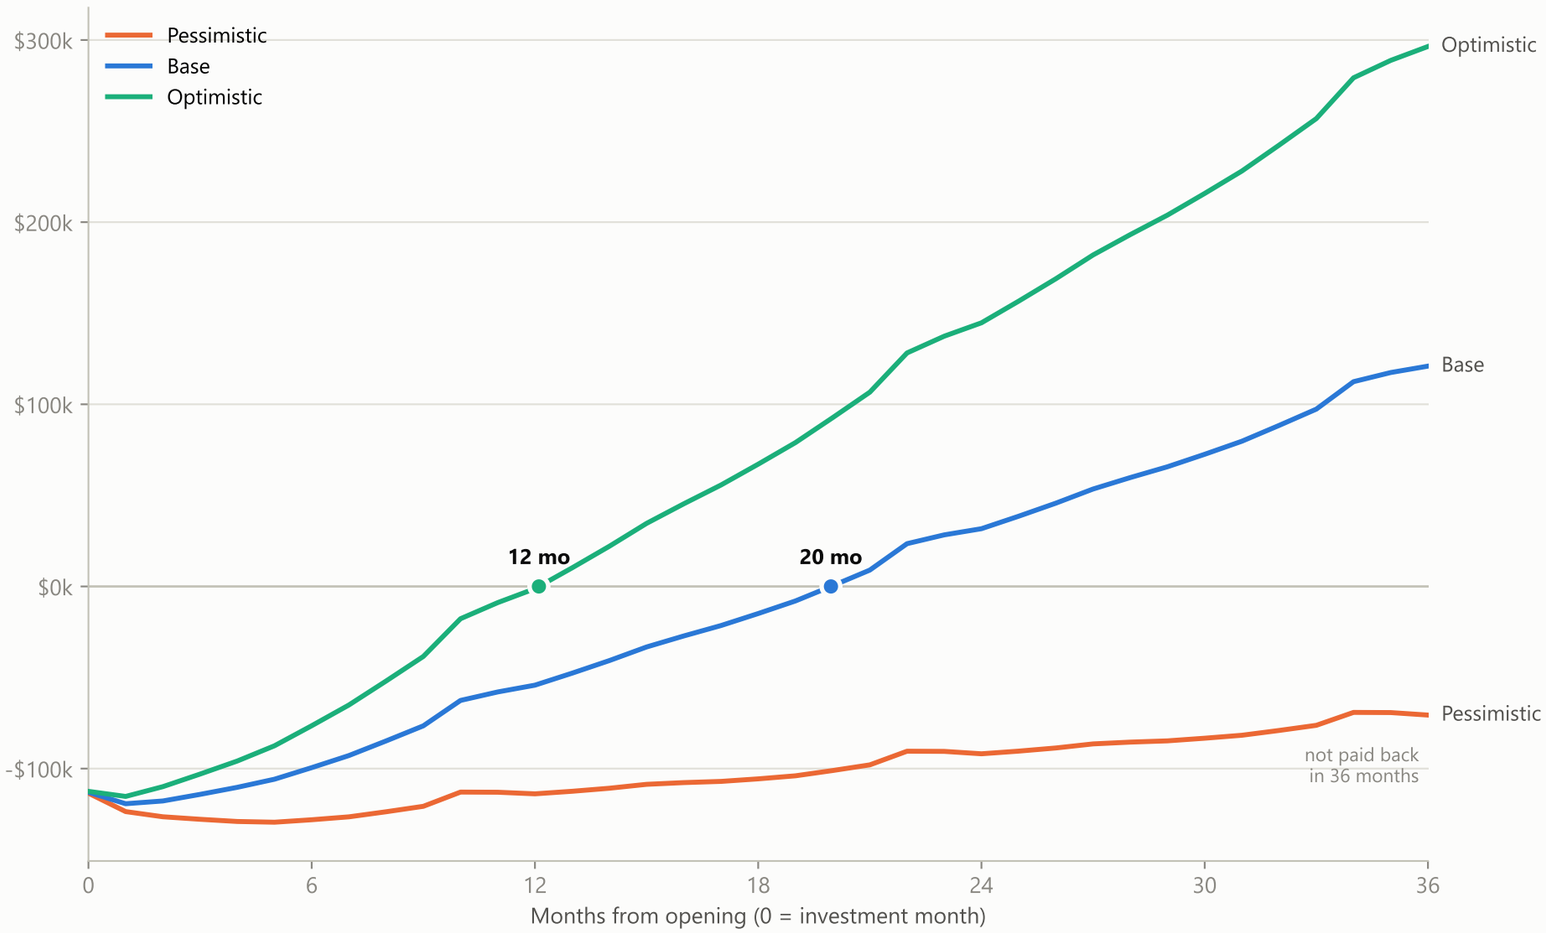
Home-goods store opening: from traffic to profit

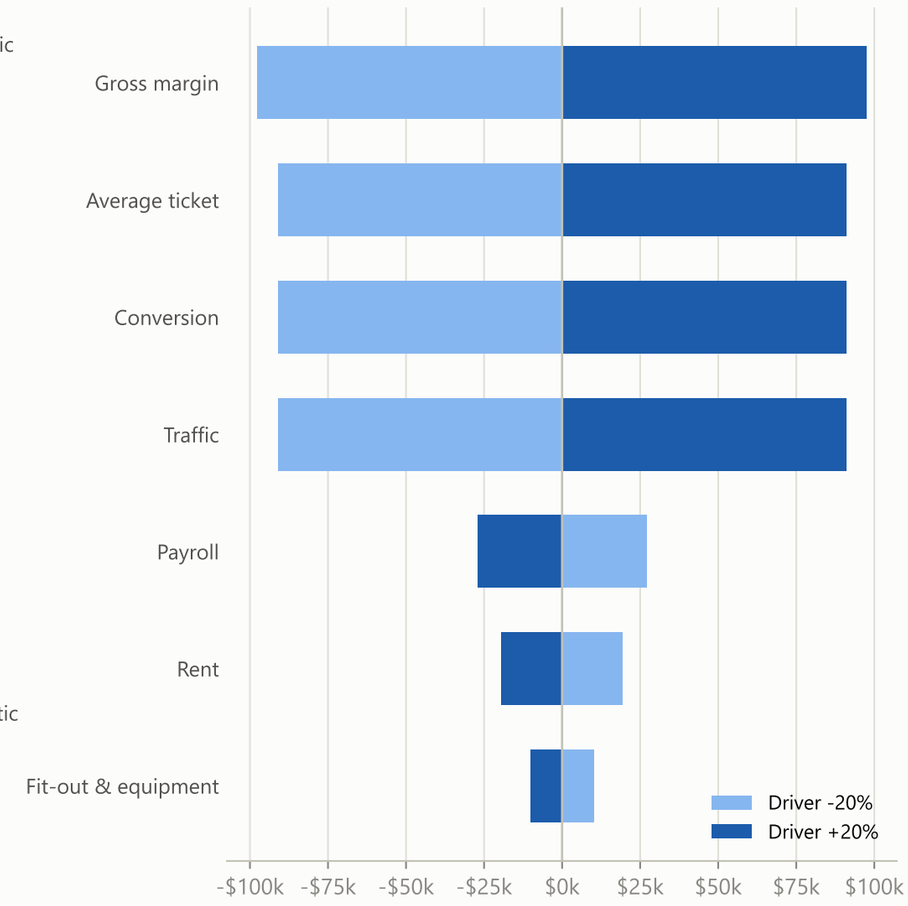
36-month financial model for a 250 m2 store in a city of ~1M people. KPIs: Base scenario. USD, excl. VAT. All data fictional.

Total investment	Payback	NPV at 20%	Break-even traffic	EBITDA margin, Year 3
$113k	**20 months**	**$93k**	**298 / day**	**14.4%**
fit-out, equipment, stock, deposit	from opening, before stock recovery	IRR 71% a year	vs 500 planned: 40% safety margin	on revenue of $741k

Cumulative cash flow and payback point by scenario



NPV change vs Base when one driver moves



Payback excludes inventory and deposit recovered at month 36; NPV and IRR include them. Source: model/store_model.xlsx (live Excel formulas).
